

Kool-vu® Louvres

CLOSE LOUVRE
TO STOP WIND & RAIN.
OPEN FOR REFRESHING AIR.

Kool-vu[®] Louvres

picture: louvres with glass blades

Specifications

Louvres frames are extruded from Aluminium alloy 6063 T5 and holding clips are injection moulded from U-V resistance polypropylene. Pivot bearings are cast aluminium rivetted to extruded anodised aluminium operating bars. A strong toggle link ensures a sturdy locking force when blades are closed.

Accessories

Weatherstrip, Torsion Bars, Mullion Joiners, Security Locks, Aluminium or Timber Blades, Standard Handles, Low Profile Handles, and Motorised Louvre.

Finishes

Aluminium frame in anodised finish and powder coated colours. The polypropylene clips and plastic handles are available in standard black, white, grey, shoji white, surfmist, white birch, stone beige, woodland grey and primrose.

Performance

Conforms to the requirements of Australian Standards AS2047 and tested to over 70000 operations of opening, shutting and locking.

Measurements

Blade Length = Jamb to Jamb less 59mm.

152mm Channel Height & Controls		
Code	Blades	Height of Channel
21-152/02	2	305
21-152/03	3	445
